

The Income-to-Wealth Recipe

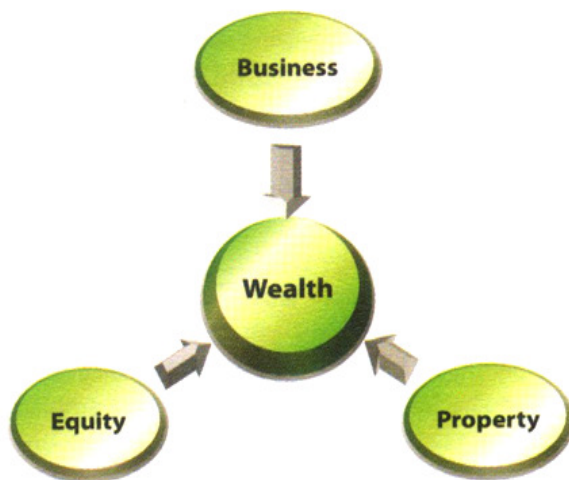

Wealth Creators

Wealth Creators will make you rich...really rich. They have the potential to substantially enhance the value of your money. They (and probably only they) will make you a millionaire. Therefore, if you want to become rich, you must have one or more of these in your portfolio.

The most common wealth creators include amongst others:

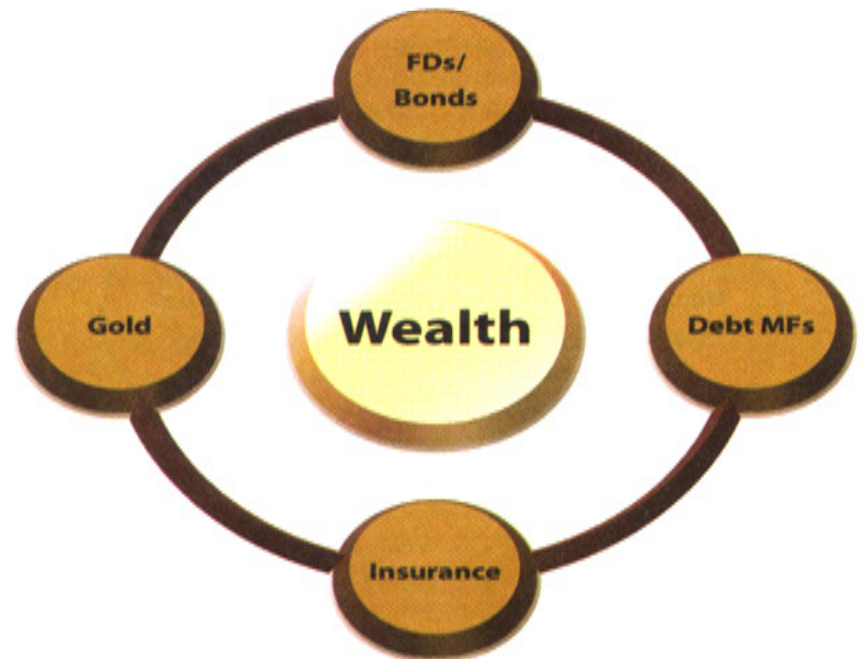

- Business
- Equity
- Property

Wealth Preservers

Wealth Preservers, as the name clearly suggests, aim to protect and conserve your wealth. Safety and security of your money is the primary objective here.

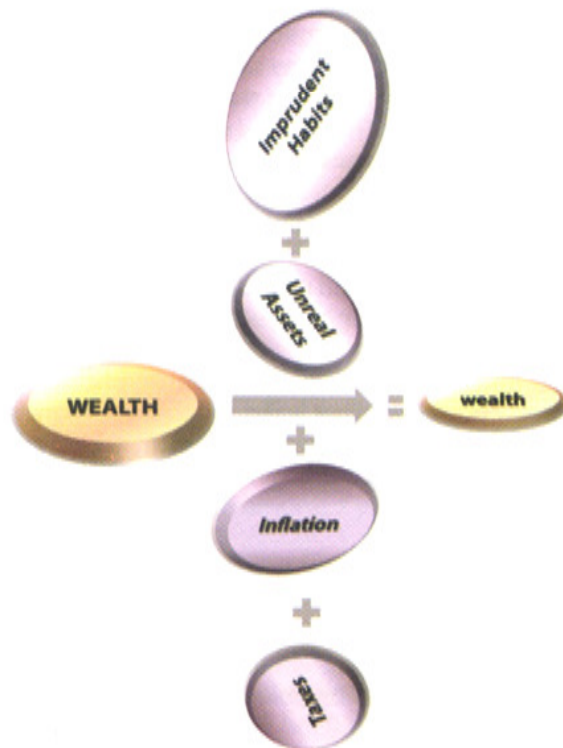

There are many products in the market that achieve this objective. Some protect your money while others are safe investment options.

Wealth Dissipaters

Certain things will slowly but surely eat into your income and/or wealth. Therefore, as time goes by, you will experience a gradual reduction in your wealth.

Wealth Destroyers

Certain threats have the power to cause massive destruction of your wealth. Hence, I term them as the Wealth Destroyers. One serious shock and your millionaire dreams could be shattered...forever.
